

## Invitation: Vibrant Mentorship Approaches

The role of work place mentors is essential to support the effectiveness of the internship course at the Namibia University of Science and Technology (NUST). The course, known as Work Integrated Learning (WIL), requires students to undertake practical work placement in industry during a semester, to apply their theoretical knowledge in a practical setting. It is therefore crucial for the workplace mentors to be equipped with the necessary skills that can make a difference in providing an effective first-hand learning. This mentorship and coaching workshop is designed to empower mentors.

### About the Facilitator

**Ms Vera Bronkhorst** is a seasoned organisational development specialist, as well as a leadership coach. She has a wide range of organisational development skills and has worked across different sectors within the African context, as well as abroad. She has designed and facilitated several organisational effectiveness initiatives, and she has accreditation in a variety of Human Resources Analytics and Psychometric assessments.

Bronkhorst values self-development as an integral part of staying abreast with new developments and further values communication and teamwork, as key ingredients to the success of any organisation.
